

# SNOW ROUTE RESPONSIBILITIES

2024-2025

**Legend**

AREA	RESPONSIBLE
<span style="display:inline-block; width:15px; height:10px; background-color:yellow; border:1px solid black;"></span>	Hardscape
<span style="display:inline-block; width:15px; height:10px; background-color:green; border:1px solid black;"></span>	Landscape
<span style="display:inline-block; width:15px; height:10px; background-color:orange; border:1px solid black;"></span>	Parking & Transportation

**PLEASE NOTE**  
Some campus sidewalks are utility distribution tunnels which are warmed by residual heat from the steam distribution system within the tunnel. Be aware that while these sidewalks often clear of snow more quickly, they are not intentionally provided with snow melt systems and there are times that the residual heat cannot keep up with conditions. This can create slick/black ice like conditions. Utility tunnel paths are indicated with ■■■■■■■■■■

**MAIN CAMPUS SNOW HANDLING MAP**  
NOT TO SCALE
